We can source steel according to specified dimensions, grades, quantities and project requirements, using our network of local and international suppliers.

Our Steel Supply Capabilities

- Structural steel
- Square tubing
- Rectangular tubing
- Round tubing
- Steel plate
- Steel sheet
- Channels
- Angles
- Beams
- Specialty steel
- Bulk steel requirements
- Project-specific steel procurement
- BOQ-based material sourcing
- Specification-based procurement

FABRICATION

Workshop & Onsite Fabrication

G-Tech Steel provides fabrication solutions for commercial, construction and industrial applications.

Our experience allows us to handle both workshop-based fabrication and onsite fabrication requirements, depending on the project.

WORKSHOP FABRICATION

- Structural steelwork
- Steel frames
- Platforms
- Brackets
- Supports
- Tanks
- Conveyors
- Guards
- Custom steelwork
- Project-specific fabrication
- General industrial fabrication

ONSITE FABRICATION

- This can include:
- Onsite fabrication
- Installation work
- Steel modifications
- Repairs
- Structural alterations
- Equipment supports
- Custom site requirements
- Project-specific steelwork

SOURCING

Global sourcing. Local delivery.

We, at G-Tech Steel, hold a **IMPORT LICENSE** and are experienced in international sourcing and importing, allowing us to assist South African businesses in accessing products and equipment from international markets.

We can investigate international suppliers where a product is unavailable, difficult to source or commercially attractive to import.

WHAT WE CAN SOURCE

- Steel
- Specialty steel
- Forklifts
- Machinery
- Industrial equipment
- Manufacturing equipment
- Specialised products
- Project-specific products
- Hard-to-source components

01-Requirement

You provide the specification, quantity, drawings or product requirement.

02-Supplier Search

We investigate suitable international sourcing options.

03-Quotation

Available products, pricing and supply options are assessed.

04-Procurement

The selected product is coordinated with the supplier.

05 – Importation

We coordinate the import process and associated logistics.

06 – Delivery

The product is delivered according to the agreed supply arrangement.

SNFC FORKLIFT

MACHINERY

Machinery Made Simple.

At G-Tech Steel, our import license and deep expertise in international sourcing allow us to help South African businesses import top-tier industrial products and manufacturing equipment from global markets.

We investigate and vet international suppliers whenever a product or machine is unavailable locally, difficult to source, or simply more commercially attractive to import.

MACHINERY WE SOURCE

- **Lipped Channel machine**
- **IBR sheeting machines**
- **Corrugated Machines**
- **Roofing Bullnose Machine**
- **Gutter Machine**
- **Welded pipe machine**
- **Ridge Cap Forming machines**

GOVERNMENT

Supporting contractors, businesses and project requirements.

G-Tech Steel can assist contractors, commercial businesses and organisations with project-specific procurement and supply requirements.

Our combination of steel procurement, fabrication and international sourcing allows us to support projects requiring more than a standard steel supplier.

PROJECT PROCUREMENT

- Bill of Quantities (BOQs)
- Material schedules
- Steel schedules
- Drawings and specifications
- Project-specific sourcing
- Bulk material requirements
- Fabricated components
- Industrial procurement
- Specialised equipment
- International sourcing
- Project supply coordination
